WHAT IS DRAIN WATER HEAT RECOVERY?

WHAT IS IT?

The Power-Pipe® is simple:

It is a heat exchanger that captures the heat from your outgoing drain water and transfers that heat to your incoming fresh water. As a result your existing hot water heating system needs to work less to get the water up to the desired temperatures.

It consists of copper tubes wrapped around a copper drain pipe. The waste water from your shower flows down the copper drain pipe, clinging to the inner surface as a very thin film. At the same time, cold fresh water travels up through the wrapped copper tubes. The heat in the waste water travels safely and efficiently through the copper and into the cold fresh water with NO MIXING. How could energy conservation be any simpler?

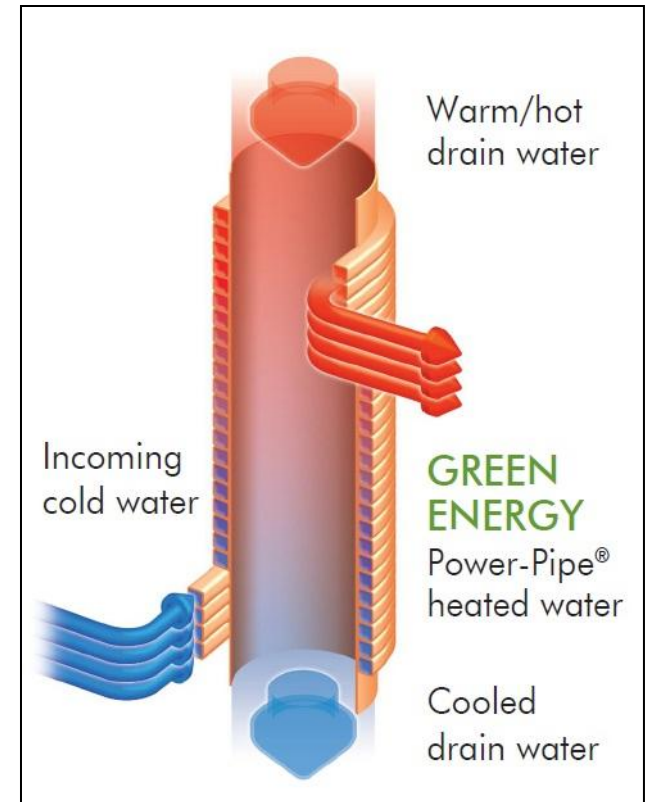

THE PROOF

Drain water heat recovery (DWHR) is an established energy-saving technology. The Power-Pipe® has been extensively tested by Natural Resources Canada (CANMET) and the University of Waterloo.

Numerous utilities and governments across North America offer financial incentives for home-owners who purchase DWHR systems. When shopping for your DWHR unit, remember that only the Power-Pipe® delivers top performance with no noticeable loss in water pressure.

The process of using outgoing warm drain water to pre-heat incoming cold fresh water with no mixing

Turn that wasted energy into Savings with the Power-Pipe®

THE POWER-PIPE®

IS YOUR HOME A GOOD CANDIDATE?

Access to a vertical section of drain pipe fed from your primary shower(s) is necessary. Usually this is the main drain pipe in your basement.

THE BASICS

Water heating is the 2nd highest energy expense in the average home and most of that energy is wasted down the drain.

The Power Pipe® reduces water heating costs by up to 35%* and can be used with ANY type of water heating system.

The Power Pipe® increases hot water capacity and is maintenance-free.

We size systems according to your needs. A Professional Installation Services technician will provide a full assessment for your location.

* For a Power-Pipe® model R3-60 according to Natural Resources Canada September 2008. Larger units will have higher expected maximum savings while smaller units will have lower expected maximum savings.

What are people saying?

"I want [a Power-Pipe®] in my house as soon as possible....If I can recover the energy from [my drain water], then great!"

DAVID SUZUKI, CTV News, April 25, 2006

"The Power-Pipe® is a practical and durable maintenance-free energy saver that doesn't ask me to change my lifestyle in any way. I'm amazed at its performance and simplicity of installation. I think it should be installed in every home."

Richard C., Engineer, Montréal, Québec

"The Power-Pipe® is a high quality product that saves us energy daily. We really notice the Power-Pipe® in action during our showers."

William M., Ph.D., North Adams, Massachusetts

"I'm thrilled with our Power-Pipe®....I'm reducing my emissions and saving money. The Power-Pipe® will have paid for itself in no time. I also love the bonus of never running out of hot water in the middle of a shower again. Even when everyone....wants to start their day with a shower, its OK."

Pauline R., Waterloo, Ontario

LEAVE THE INSTALLATION TO THE EXPERTS

Licensed and trained installers

Every Installation Service Provider meets our stringent licensing and insurance requirements and offers thorough product and installation know-how. They have been professionally trained to ensure your Power-Pipe® system is installed properly to ensure maximize savings.

Canadians trust The Home Depot for quality Installation Services

Reliable and Worry-Free.

Our installers are committed professionals backed by a name you can trust. The Home Depot ensures our installers have passed numerous background checks through our partnership with BackCheck™. These checks include: Trade license checks (where required by local legislation); criminal background checks and up-to-date Workers Compensation Coverage.

Your Results Guaranteed.

Our #1 priority is your satisfaction. We stand behind your project with a guarantee as solid as The Home Depot. *(see contract for details)*
